...years. Over that time, this fund has grown to become a larger percentage of their **portfolio** than is prudent. The capital gains and resulting taxes the client would owe upon a sale make you reluctant to reposition the **portfolio**. If you do nothing, the problem will likely become even more extreme over time. What...

TEXT:

...years. Over that time, this fund has grown to become a larger percentage of their **portfolio** than is prudent. The capital gains and resulting taxes the client would owe upon a sale make you reluctant to reposition the **portfolio**. If you do nothing, the problem will likely become even more extreme over time. What...reinvest it, and there is certainly no

requirement to do so

Reinvesting distributions for a **portfolio** holding that is already too large will only compound the problem. Simply inform the mutual...

...the lowest cost-basis shares of a fund that is overweighted will help solve the **portfolio** dilemma as well.

You should be aware of a few intricacies regarding the gifting of...

...Offset winners with losers. Perhaps the most common technique for the tax management of a **portfolio**, either stocks or mutual funds, is to sell a losing position in order to offset...sale.)

Now, here are some considerations for funds you may want to add to a **portfolio**. Whereas the above discusses how to deal with a fund if it is already part of a **portfolio**, the following are factors you should consider for additions to a **portfolio**. Although tax considerations will not yield any advice on what type of fund to purchase...

...funds need only distribute realized gains (as opposed to unrealized gains).

If a fund has **portfolio** turnover of 100%, then the average holding period for each investment is one year. A...

...turnover has a two-year average holding period, and so on. Funds with a higher **portfolio** turnover will usually, but not always, have year-end distributions that are higher than funds with lower **portfolio** turnover. In addition, high-turnover funds are more likely to distribute more in the form...

...nothing about the likelihood of those gains being realized.

Any fund that has historically low **portfolio** turnover, and whose turnover is expected to remain that way, should have no reason to...to minimize the tax consequences.) In essence, past tax efficiency may make an older, low **portfolio** turnover fund less attractive to potential new investors; only time will tell.

* Don't buy...

...your clients' taxes and increase their after-tax return while allowing you to rebalance their **portfolio** over time. Along the way, you will create clients who are more satisfied with the...
